

EV HUB LIVE

A live video podcast on transportation electrification

EV Hub Live is a first-of-its-kind video podcast recorded live and distributed for free to the public policy community working to advance transportation electrification. Hosted by Atlas Public Policy's founder, Nick Nigro, the podcast will run at least once a month and be focused on presenting valuable content to the public policy professional. As the podcast will be recorded live, listeners will be able to ask guests questions in real-time. More information on EV Hub is available at www.atlasevhub.com.

Content for the Public Policy Professional

EV Market Developments: We'll review market developments including vehicle sales and other statistics actively tracked on EV Hub. We'll also look ahead to upcoming vehicle releases, market factors to watch, etc. Episodes will feature market analysts and guest hosts and will be recorded on a quarterly basis. We'll also host special episodes focused when news breaks.

New Research: New reports on transportation electrification are published constantly. EV Hub Live will provide a forum to dive deep into these reports by featuring interviews with the lead author(s). The reports will cover the gamut of transportation electrification, including market forecasts, environmental impacts, public policy proposals and analyses, etc.

Public Policy Developments: Governments at all levels are enacting policies that aim to advance or harm transportation electrification. Episodes on policy will focus on new policies including regulations, incentives, fees, etc., and will feature interviews with leading policy analysts and relevant government officials.
