

EV HUB LIVE

A live video podcast on transportation electrification

EV Hub Live is a first-of-its-kind video podcast recorded live and distributed for free to the public policy community working to advance transportation electrification. Hosted by Atlas Public Policy's founder, Nick Nigro, the podcast runs about once a month and features candid discussions on electrifying transportation that are geared towards the public policy professional. The podcast is broadcast live on YouTube where viewers can ask questions in real-time. More information on EV Hub is available at www.atlasevhub.com.

Valuable Discussions on
Electrifying Transportations for
the Public Policy Professional

EV Market Developments: We review market developments including vehicle sales and other statistics actively tracked on EV Hub. We also look ahead to upcoming vehicle releases, market factors to watch, etc. Episodes feature market analysts and guest hosts. We'll also host special episodes when news breaks.

New Research: New reports on transportation electrification are published constantly. EV Hub Live provides a forum to dive deep into these reports by featuring interviews with the lead author(s). Reports featured on EV Hub Live cover the gamut of transportation electrification, including market forecasts, environmental impacts, public policy proposals and analyses, etc.

Public Policy Developments: Governments at all levels are enacting policies that aim to advance or harm transportation electrification. Episodes on policy focus on new policies including regulations, incentives, fees, etc., and feature interviews with leading policy analysts and relevant government officials.
