VAST DATABASE OF EV-RELATED MARKET STATISTICS AND POLICIES UPDATED CONSTANTLY

BUILT BY ATLAS PUBLIC POLICY IN WASHINGTON, DC USA
The Atlas EV Hub gives stakeholders from across the electric vehicle industry quick access to key data and information on the market, policies and regulations, and developments central to the EV community. The site is intended to be a one-stop shop for businesses, policy professionals, and the advocacy community to learn more about what’s going on in the EV market. The EV Hub is a product of the broad and diverse EV community. Contributors include private companies and utilities, all levels of government, and leading research and non-profit organizations.

www.atlasevhub.com

The Atlas EV Hub is an online platform designed to equip all stakeholders with actionable information on the EV market. The objective of EV Hub is to bring a data-driven approach to policymaking around transportation electrification and accelerate market growth.

The EV Hub contains a wealth of data on the transportation electrification market, including vehicle registrations, infrastructure deployment, public policy, research, public and private funding awards and opportunities, and media coverage. The site aggregates this information in easy-to-use dashboards to quickly find what you’re looking for.

Since early 2017, Atlas has been working with NGOs, companies, and state and local public officials to create a one-stop shop for information on transportation electrification. The EV Hub is designed to save people time and allow organizations to more effectively allocate resources to work on advancing the market.
No login required! Other content on the EV Hub requires a user account.
We offer discounts on bulk license purchases and are happy to discuss how we can provide you with a company-wide (enterprise) license.
