ABOUT EV HUB

The Atlas EV Hub gives stakeholders from across the electric vehicle industry quick access to key data and information on the market, policies and regulations, and developments central to the EV community. The site is intended to be a one-stop shop for businesses, policy professionals, and the advocacy community to learn more about what's going on in the EV market. The EV Hub is a product of the broad and diverse EV community. Contributors include private companies and utilities, all levels of government, and leading research and non-profit organizations.

- Enacted policies, proposed legislation, request for proposal and information, and public funding.

State Policy 

- A comprehensive database of EV-related filings from investor-owned utilities.

Electric Utility Filings 

- Data on vehicle availability, plans, policy positions, and EV sales for major automakers in the United States.

Automakers 

- EV charging deployment in the United States at the national, state, and local level.

EV Charging Deployment 

- Raw data of state EV registrations.

State EV Registration Data** 

- Investments that have been made by automakers and other private sector entities in transportation electrification globally.

Global Private Investment 

- Explore criteria pollutants and greenhouse emissions from all sources by region, state, or county using these dashboards.

Emissions 

- Explore data on local and state demographics from the U.S. Census Bureau.

Demographics 

- Video podcast recorded live and distributed for free to the public policy community working to advance transportation

EV Hub Live** 

- Browse online resources related to the EV market, including reports, websites, and tools.

Resource Library** 

- Explore what's driving media coverage on transportation electrification.

Media Pulse 

- Catch up on all the happenings on the EV Hub through our weekly digest.

EV Hub Weekly Digest** 

- Search for an event on the EV market.

Events Calendar** 

- Full directory of all EV Hub users and a directory of other contacts in the EV community.
